Read and download free pdf of CBSE Class 7 Science Transportation In Plants And Animals Worksheet. Students and teachers of Class 7 Science can get free printable Worksheets for Class 7 Science in PDF format prepared as per the latest syllabus and examination pattern in your schools. Standard 7 students should practice questions and answers given here for Science in Grade 7 which will help them to improve your knowledge of all important chapters and its topics. Students should also download free pdf of Class 7 Science Worksheets prepared by school teachers as per the latest NCERT, CBSE, KVS books and syllabus issued this academic year and solve important problems provided here with solutions on daily basis to get more score in school exams and tests Transportation In Plants And Animals Class 7 Science Worksheet Pdf Class 7 Science students should refer to the following printable worksheet in Pdf for Transportation In Plants And Animals in standard 7. This test paper with questions and answers for Grade 7 Science will be very useful for exams and help you to score good marks Class 7 Science Worksheet for Transportation In Plants And Animals CBSE Class 7 Science - Transportation In Plants And Animals Worksheets have become an integral part of the education system. Worksheets are very critical for every student to practice his/ her concepts. Students, teachers and parents can download all CBSE educational material and extremely well prepared worksheets from this website. All revision worksheets, Sample papers, Question banks and easy to learn study notes for all classes and subjects have been prepared based on the latest guidelines sent by CBSE. All CBSE educational material is developed by our panel of teachers, have also been submitted by thousands of teachers and students. The study material has been carefully compiled by the best teachers in India. Worksheets have been submitted by teachers of various CBSE schools and also have been carefully developed keeping into consideration the latest CBSE syllabus. BAL BHARATI PUBLIC SCHOOL, PITAMPURA, DELHI-110034 CLASS 7 REVISION ASSIGNMENT TRANSPORTATION IN PLANTS AND ANIMALS VERY SHORT ANSWER TYPE QUESTIONS Q1. Why is color of blood red? Q2. What does blood consist of? Q3. What is removed along with water as sweat? Q4. What is absorbed by roots from the soil? Q5. By which vascular tissue, water and nutrients are transported in the plants? Q6. What is the function of stethoscope? Q7. What is pulse? Q8. How does pulse occur? Q9. Which parts of the body comprise circulatory system? Q10. Write the names of upper and lower chambers of heart. Q11. Which pigment is necessary to provide efficiently to all the cells of the body? Q12. What is the major excretory product in humans? SHORT ANSWER TYPE QUESTIONS Q1. Why is transport of materials necessary in a plant or in an animal? Q2. What are the functions of white blood cells? Q3. How is clot formed? Q4. What is the main function of heart? Q5. What are the functions of arteries and veins? Q6. What will happen if there are no platelets in the blood? Q7. Why is it necessary to excrete waste products? Q8. What is transpiration? How is it useful to plants? Q9. What is the function of sweat? Q10. What is meant by excretion? Q11. Why is blood needed by all the parts of the body? Q12. Why do plants absorb a large quantity of water from the soil? Q13. Differentiate between: 1. arteries and veins. 2. atrium and ventricle. 3. RBC and WBC. 4. xylem and phloem. Q14. Why do sponges and hydra not have blood? Q15. How does heart avoid mixing of blood? Q16. Why valves present in veins? Q17. Why do arteries have thick walls? Q18. Why do veins have thinner walls? Please click the below link to access CBSE Class 7 Science - Transportation In Plants And Animals Click to View or Download pdf file - Click for more Science Study Material - Datesheet for CBSE Board Exams Class 10 (Scroll down for Class 12 Datesheet) Datesheet for CBSE Board Exams Class 12 UNESCO has declared 21st February of every year to be celebrated as International Mother Language day to promote dissemination of Mother Language of all, create awareness of linguistic and cultural traditions and diversity across the world and to inspire solidarity... CBSE vide Circular No.Acad-51/2021 dated 5th July, 2021, notified that in the session 2021-2022, Board Examinations would be conducted in two terms, i.e., Term I and Term II. This decision was taken due to the uncertainty arising out of COVID 19 Pandemic. Term I... Evaluation of the Answer Books is done under a well-settled Policy. To ensure that the evaluation is error free, CBSE is taking several steps. After strictly following these steps, the result is prepared. Though, CBSE is having a well-settled system of assessment... A. Match the following: 'A' 'B' 1. Stomata. Absorption of water. 2. Xylem. Transpiration. 3. Root hair. Transport of food. 4. Phloem. Transport of water. Synthesis of carbohydrates. Fill in the blanks: 1. The blood from the heart is transported to all parts of the body by the 2. Haemoglobin is present in 3. Arteries and veins are joined by a network of 4. The rhythmic expansion and contraction of the heart is called 5. The main excretory product in human beings is 6. Sweat contains water and 7. Kidneys eliminate the waste materials in the liquid form called 8. Water reaches great heights in the trees because of suction pull caused by 9. Tick (✓) the correct option: 1. In plants, water is transported through (a) xylem (b) phloem (c) stomata (d) root hair. 2. Water absorption through roots can be increased by keeping the plants: (a) in the shade (b) in dim light (c) under the fan (d) covered with a polythene bag. 3. Human heart is: (a) 3-chambered (b) 2-chambered (c) 4-chambered (d) none of these. 4. Which one of the following is excreted by fish? (a) Ammonia (b) Uric acid (c) Urea (d) None of these. 5. The blood cells that form a part of body's defence mechanism are: (a) red blood cells (b) platelets (c) white blood cells (d) all of these. D. Answer the following questions in short: 1. Why is transport of materials necessary in a plant or in an animal? Explain. 2. What will happen if there are no platelets in the blood? 3. What are stomata? Give two functions of stomata. 4. Does transpiration serve any useful function in the plants? Explain. 5. What are the components of blood? 6. Why is blood needed by all the parts of a body? 7. What makes the blood look red? 8. Describe the function of the heart. 9. Why is it necessary to excrete waste products? 10. Draw a diagram of the human excretory system and label the various parts. 11. Why is the colour of blood red? 12. Xylem transports sap upwards only whereas phloem transports food in both directions. Why do you think there is a difference? 13. Why do we get white patches on our clothes on a hot summer day? E. State 'True' or 'False': 1. Haemoglobin is found in WBC. 2. Transpiration is dependent on absorption of water. 3. Neurons are the filtering units of kidney. 4. During an exercise, the heart-beats of humans fall sharply. F. Find out about blood groups and their importance. G. Record the pulse rate while doing various activities in the table given below. You can do this for your family members. Worksheets for Class 7 Science in this page we have Transportation in Animals and Plants Worksheet. Hope you like them and do not forget to like, social share and comment at the end of the page. Question 1 a. component of RBC transport oxygen from the lungs to all the cells of body. b. One complete cycle of contraction of the heart followed by its relaxation is called c. are the blood vessels that carry blood from the heart to various parts of body. d. are the extremely thin blood vessels which connect arteries to veins. e. The main excretory product in human being is f. Platelets play major role in blood g. Throbic movements due to blood flow in arteries are called h. is fluid connective tissue that flows in blood vessels. i. The movement of solvent molecules from their high concentration to their low concentration through a semi-permeable membrane is called j. A physical process which involves movement of molecules (solid, liquid and gas) from the region of higher concentration to that of lower concentration is called k. Loss of water in the form of vapour through leaves is called l. The transportation of food from the leaves to other parts of plant is called Answer haemoglobin. Heart body Arteries Capillaries Urea Clotting Pulse Blood Osmosis Diffusion Transpiration Translocation Question 2 a. Pumping of heart is b. The tiny branches of blood vessels that connect arteries with the veins are called c. Blood contains a pale yellow liquid called d. The red blood cells contain e. destroy the germs that enter our body. f. The Heartbeat is indicated by j. Bacteria are organisms. h. help in preventing the blood from flowing back. i. The lower chambers of the heart are called the j. The impure blood is transported from the right ventricle to the lungs by k. The receives oxygenated blood from the left ventricle. l. The veins that collect blood rich in carbon dioxide from all the parts of the body is m. The blood carried by the Pulmonary artery is n. The contraction and relaxation of the heart is called the o. Our heart beats times per minute. p. The transport system in plants is called q. The structure that transport water and minerals in plants is r. Water rises in the xylem tubes due to s. The tissue that transport food in plants is the t. The loss of water from the stomata is called Answer a. an involuntary action b. capillaries c. plasma d. haemoglobin e. White blood cells f. pulse g. unicellular h. Valves i. ventricle j. pulmonary arteries k. aorta l. Vena cava m. deoxygenated n. Heartbeat o. 70 to 80 p. vascular system q. xylem r. transpiration pull s. phloem t. transpiration Question 3 a. Name the artery which carries de-oxygenated blood. b. Name the plant tissue which transports water & minerals c. Name the plant tissues which transports food from leaves to different parts of plants d. Aquatic animals like fishes excrete body wastes as e. Animals like snakes excrete semi-solid white coloured compound called f. What is the average heartbeat of an adult human? g. Name the instrument which is used by doctor to measure rate of heart beat h. Name the vein which carries oxygenated blood i. Name the chamber of heart which receives de-oxygenated blood from whole body j. Name the chamber of heart which pumps oxygenated blood to whole body k. Name the process of cleaning the blood of a person by separating the toxic waste products using artificial kidney machine l. Name the instrument that helps to measure blood pressure. m. What is the main filtration unit in kidney? Answer Pulmonary artery Xylem Phloem Ammonia Uric acid 72 to 80 per min Stethoscope Pulmonary veins Right atrium Left ventricle Dialysis Sphygmomanometer Nephron Question 4 In a tall tree, which force is responsible for pulling water and minerals from the soil? (a) Gravitational force (b) Transportation force (c) Conduction force (d) Suction force Question 5 Aquatic animals like fish excrete their wastes in gaseous form as (a) Oxygen (b) Hydrogen (c) Ammonia (d) Nitrogen Answer Question 6 Across 5. The instrument used for measuring heart beat. 6. These carry blood from all parts of the body back to the heart. Down 1. The process of removal of wastes produced in the cells of the living organisms is called 2. The process by which blood is filtered periodically through an artificial kidney. 3. The vascular tissue for the transport of water and nutrients in the plant is called the 4. The red pigment in the blood Answer excretion dialysis xylem haemoglobin stethoscope Veins Question 7 Unscramble the below jumbled word LATLETPSE RHTUREA MNIMAOA ATNSRRRIATONP AATOTSM Answer Platelets Urethra Ammonia Transpiration stomata Question 8 Give reasons: Valves are present in veins. Arteries have thick & elastic muscular wall. Left ventricle has thicker wall than right ventricle. White patches are formed on our clothes in summer. Question 9 (a) Differentiate between transport of substances through xylem and phloem. (b) Differentiate between arteries and veins. (c) How do sponges and Hydra transport food and oxygen although they do not possess any circulatory system? (d) Name the organs of the circulatory system? (e) Name the gas that easily binds to the red blood cells? (f) What is heart rate? (g) Name the transport system in plants? (h) Name the organ of the excretory system in humans? (i) Which organ of the body filters the blood? (j) Why is blood red? (k) What type of blood cells protect us from infectious disease? (l) List the functions of blood? Question 10 (a) Write a note on functioning of heart. (b) Explain excretory system in humans. Draw a well labelled diagram. (c) Describe the function of blood platelet? (d) What is the lymphatic system made up of? (e) What is the blood of vertebrates made up of? (f) Why does your heartbeat increase when you run? (g) Define excretion? (h) What is transpiration? Question 11 (a) Describe the composition of blood? (b) Describe the structure of the human heart with a diagram? Question 12 (a) How does oxygen rich blood reach every part of the body? (b) How is excretion different from egestion? Give at least two points of differences? Question 13 How is blood purified in the Kidney? Question 14 Describe the vascular system in plants? Question 15 What are xylem and phloem? What are their roles? Question 16 Draw a neat and labelled diagram of the human urinary system and explain the function of Kidneys? Question 17 Explain how the transportation of food, water and Minerals happens in plants? Question 18 Differentiate between arteries, veins and capillaries on the basis of wall type, valves, function and blood flow? link to this page by copying the following text Transportation in Animals and Plants Worksheet for Class 7 Science Also Read Class 7 Maths Class 7 Science
